

"With our StürtzCloud, we bridge the gap between the planning world and production, marking yet another milestone towards meaningful digitalization."

Ron Römer,
Head of Stürtz Digitalization

THE MISSING LINK BETWEEN YOUR PLANNING WORLD AND YOUR PRODUCTION.

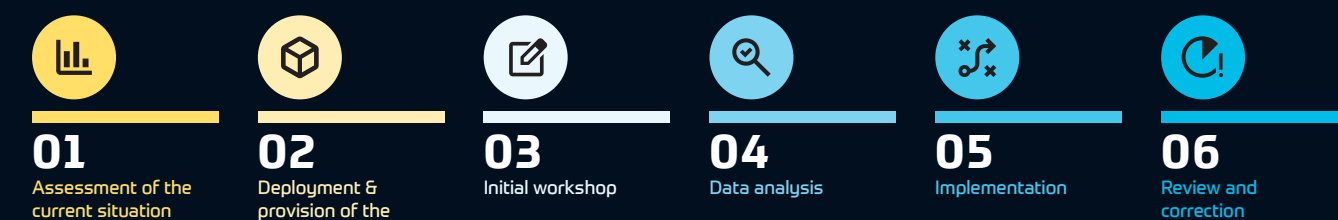

With our Cloud Solution, you have access to all relevant metrics, empowering you to enhance the efficiency of your production based on these insights.

THE NEW STÜRTZ CLOUD PROVIDES **TANGIBLE** BENEFITS:

- ✓ Transparency throughout the entire production process
- ✓ Optimization of Overall Equipment Effectiveness (OEE), by up to 30 percent
- ✓ Integration of new, existing, and third-party machines
- ✓ Efficiency enhancement through optimal utilization of available resources
- ✓ User-friendly visualization and simplified presentation of complex data
- ✓ Central availability of all essential documents
- ✓ Accessible on all devices, flexible and independent
- ✓ Multi-client capable, easily scalable and individually configurable as required
- ✓ Reduced IT administrative overhead
- ✓ Enhanced data security and protection against data loss
- ✓ No investment costs for server hardware

SO YOU CAN FOCUS ON YOUR **CORE BUSINESS**, INCREASING YOUR COMPETITIVE EDGE AND GROWTH OPPORTUNITIES:

CLOUD SOLUTIONS

IF YOUR PRODUCTION FEELS LIKE A

PASSION FOR INNOVATION

Innovation means improvement, making things more efficient, more powerful and more profitable. At Stürtz, this is part of our DNA.

Whether as a turnkey supplier or as a service provider, this quality standard runs through all of our offerings.

Our machines and systems make it easy for you to deliver the best quality with the right level of automation for your production environment.

Stürtz is a full-service provider. We do everything we can to make your production processes not only easier, but also more reliable and, above all, more efficient. We are committed to our customers' success. This goes beyond just plant engineering and production. Stürtz' digital solutions provide the essential linkage between your planning processes and the reality of the production floor.

This dedication transcends the realm of plant engineering innovation; we also provide the essential linkages between your planning processes and production.

Our Cloud Solutions provide you with the digital toolbox necessary to actively control your production, anytime and anywhere, shifting from reactive to proactive management. The Stürtz-Cloud epitomizes complete transparency, shedding light on opaque production processes.

UNLOCKING THE OPTIMUM
CAN ONLY BE ACHIEVED
WITH A SYSTEMATIC
APPROACH.

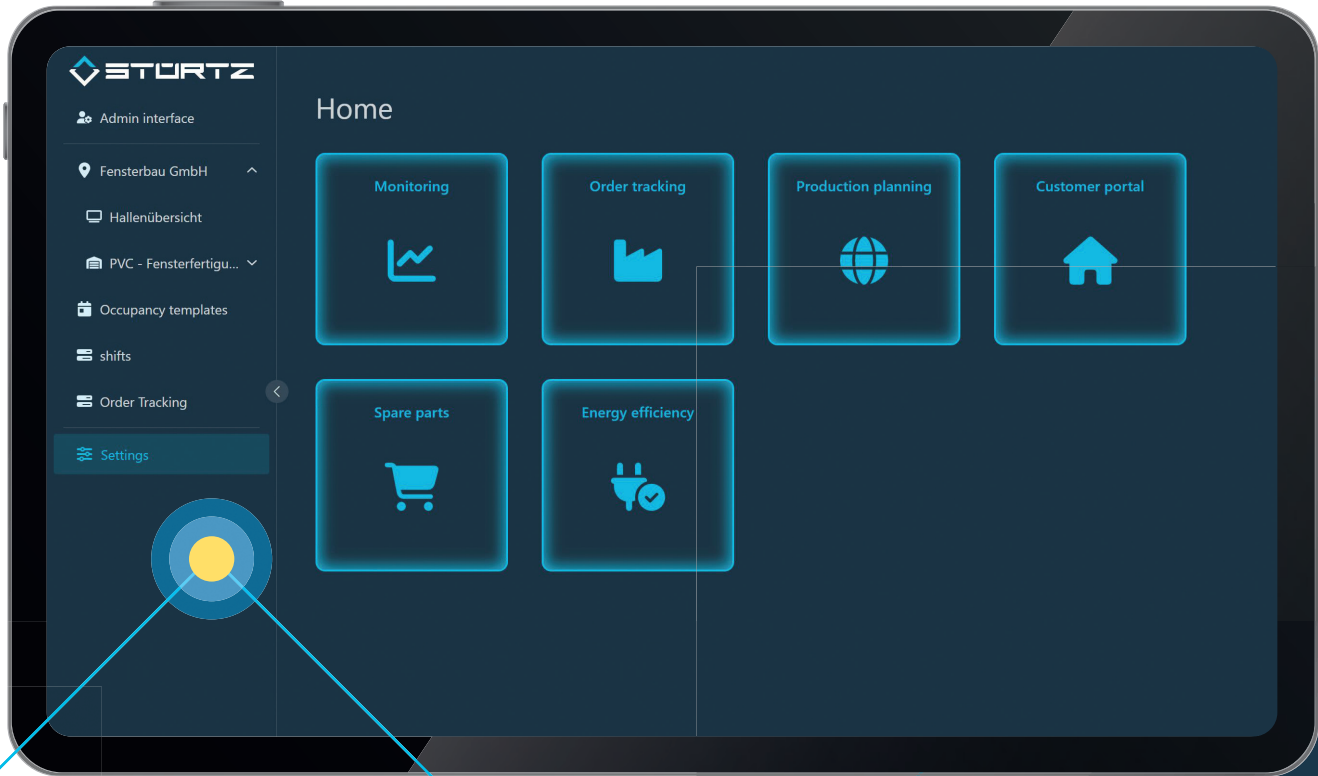

With StürtzCloud Solutions, you analyze and optimize your production through centralized data capture and processing. By providing clear and meaningful metrics, you make sustainable decisions with immediate impact. The StürtzCloud platform offers essential tools such as monitoring, order tracking, order planning, a digital spare parts catalog, and much more.

Through **condition monitoring**, you maintain a live overview of your production, utilizing dashboards that provide all OEE-relevant Key Performance Indicators (KPIs), including availability, performance, and quality indicators.

With the **order tracking** function, you stay informed about the progress of your orders, observing where they are in the production process regardless of whether they are in a machine or at a manual workstation.

The **order planning** module assists you in efficiently utilizing production capacities while ensuring reliable delivery dates are planned.

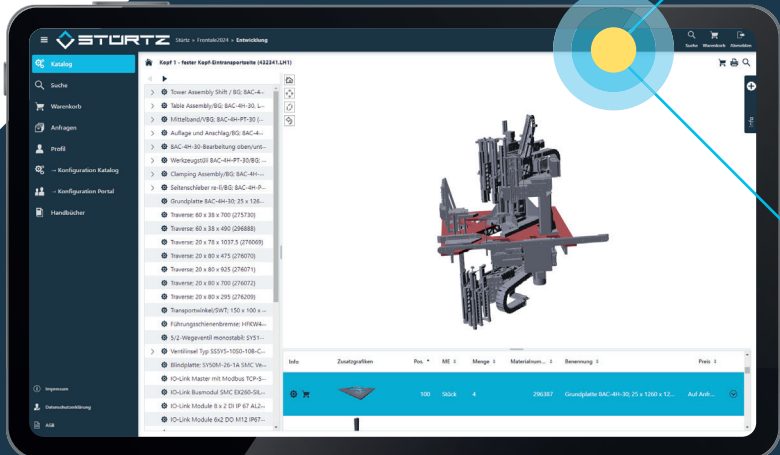

CONNECT YOUR
PRODUCTION
PROCESSES.

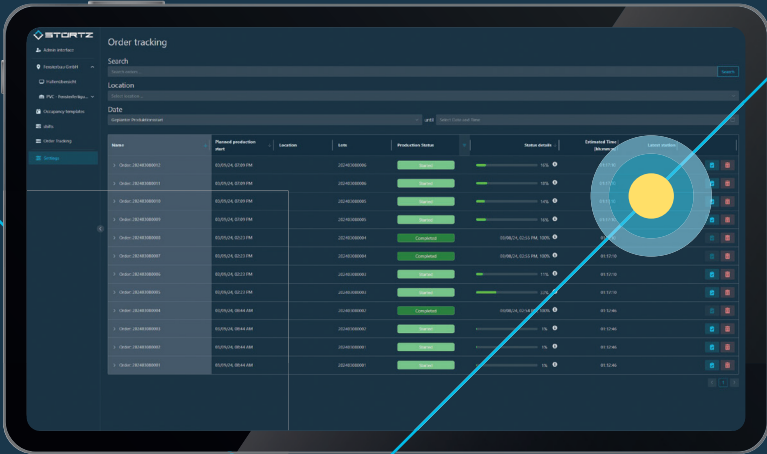

StürtzCloud Solutions - your start into a digital production organization.

Your customized dashboard with all production-relevant information - intuitively readable.

Digital spare parts catalog - for easy identification and ordering of spare parts, 24/7.

Order data with workstation information and live processing level.

Preparatory, precise order and capacity planning based on individual time-, human- and product-based factors. (Available from Q4/2024)
